**ANALYSIS OF SOME DISCREPANCIES BETWEEN RULES
OF THE NATIONAL LAW ON THE EXAMPLE OF THE LAW OF UKRAINE
“ON PRINCIPLES OF THE STATE LANGUAGE POLICY”**

The issue of conflicts in legislation or significant differences between the legal provisions remains very important because it has a direct relationship with the impact on legal, economic, and social systems in Ukraine.

The purpose of the article is a review and analysis of some discrepancies and inconsistencies between the regulations of Ukrainian legislation, which have different legal force, and the consequences of ignoring certain laws.

According to Article 8 of the Constitution of Ukraine, the rule of law is recognized and operates in our country, which means that the basic law has supreme legal force. Laws and regulations are accepted only on its basis.

However, the current legislation, like any other system, is characterized by inconsistency. One of the types of such inconsistencies is formal or internal inconsistencies – contradictions within the legal system.

The differences in the legislation are a form of legal conflicts arising if there are contradictions between the really or formally valid laws, which are enshrined in the legislation and regulate the same factual relations.

Therefore, in the article based on the analysis of legal acts of legislation of Ukraine, which have different legal force, the author revealed some discrepancies and inconsistencies and the consequences of ignoring certain laws.
