ON THE ISSUE OF CONTROL OVER ACTIVITIES OF LAW ENFORCEMENT AUTHORITIES

The article determines a list of objectives for control over activities of law enforcement authorities. The purpose of such monitoring is clarified. Characterized the current legislation of Ukraine and scientific literature in terms of defining their objectives of control over the activities of law enforcement authorities. A concept of "purpose of control over activities of law enforcement authorities" is formulated.

The establishment of rule of law in Ukraine requires a real rule of law, strengthening discipline, law, and order in the country, enforcement of the rights, freedoms, and lawful interests of individuals, the rights and interests of legal entities and other collective entities. An important role in this task belongs to law enforcement authorities. However, equally important is discipline and legality in the activities of law enforcement agencies themselves, hence there is a need to establish an effective system of monitoring of their activities as the most effective means of ensuring discipline and legality.

The purpose of this article is to determine the list of tasks of control over law enforcement au-

thorities in connection with what it is planned to: clarify the purpose of such a control; describe the current legislation of Ukraine and the scientific literature in order to determine their tasks of control over law enforcement authorities' activities; formulate the concept of "purpose of control over law enforcement authorities' activities."

An analysis of the above tasks of control, which some scientists considered appropriate to define as basic, enabled the following conclusions: first, most scholars see the task of monitoring to ensure legality in public administration, which, in our opinion, is its purpose; secondly, scientists do not carry a clear distinction between the goal of control and objectives of control and, therefore, the goal and objectives of control are identified. Taking into account legal definitions and theoretical provisions for control tasks, we propose a list of objectives of control over the activity of law enforcement authorities.

Defining goals and objectives of control over the activities of law enforcement authorities covered by such concepts as "destination of control" allowed formulating the latter.
